### Adjustable Angle Tilter

Snare angle adjustment is speedy and flexible. Yamaha's exclusive Ball Clamp design on the SS950 lets you set your snare at any angle you like. The large wing bolt tightens securely to hold the angle.

### Snare Basket Adjustment Knob

Improved grip design delivers great gripping power.

### Big Rubber Feet and Spikes

In addition to the wide leg stance, the big rubber feet deliver maximum grip to hold the stand securely in place.

# Yamaha Drum TOM HOLDERS

## Ball Mount & Clamp

The Yamaha original ball mount and clamp system offers unparalleled flexibility and ease of positioning. A generous sized hard synthetic resin ball sits in an attractive chromed housing that permits the tom hex rod to be positioned in almost any imaginable position. The ball joint friction-free operation provides ease of set up, while a large wing bolt provides one touch locking.

Large Wing Bolt

Steel Plate

Hard Resin Ball

Cap

The cap reduces noise and protects the holder when no tom clamp is inserted.

Pipe Cap

Cap eliminates unnecessary vibrations from the bass drum.

## Memory Clamp

Attaching the clamp at an ideal position reduces setup time. Helps eliminate rattle and noise and can be used inverted.

## Triple Tom Holder

The Yamaha triangular triple tom holder expands the range of possibilities for creative setups. Cymbals or tom toms can be added as your style demands.
