World Touring is our Jam

The world's largest touring and music festival supply companies state that Yamaha drums and hardware are the most requested and reliable available, which inspired our design team to create the TOUR CUSTOM MAPLE Traditional Satin series. Continuing the design legacy of our original Absolute Series, these new drums combines the projection and expressive capability of all-maple shells with the beautiful grain of US maple inside and out.

All Maple Shell

(6ply-5.6mm / 45 degree bearing edge)

Yamaha Enhanced Sustain System - Y.E.S.S

Inverse Dyna Hoop (2.3mm)

All-maple shells give Tour Custom drums their warm, bright tone. These shells are designed with a 6 ply-5.6mm / 45 degree bearing edge that adds the tonal depth, quick response and provides just the right amount of sustain. Finished with a beautiful satin lacquer (with all-new colors) that maximizes the sonic potential of the maple shell, Tour Custom drums sound great and play well in any musical style.

YESS mounts are designed to minimize contact between the shell and the mount to deliver a wider dynamic range and longer sustain.

Newly designed 2.3mm Inverse Dyna hoop controls the natural overtones inherent to all-maple drums and focuses the fundamental tone of the shell.

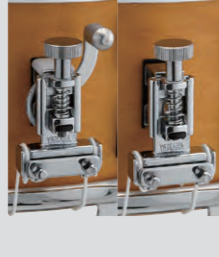

Absolute Lugs

Absolute Lugs firmly secure to the shell with a single bolt thus minimizing the number of holes in the shell. This sophisticated design reduces surface contact allowing the shell to resonate freely. Their durable design also accommodates high-tension tuning. Absolute lugs also feature an insertion plate inside of the lug, which acts as a locking mechanism to prevent tuning bolts from loosening.

P type Strainer

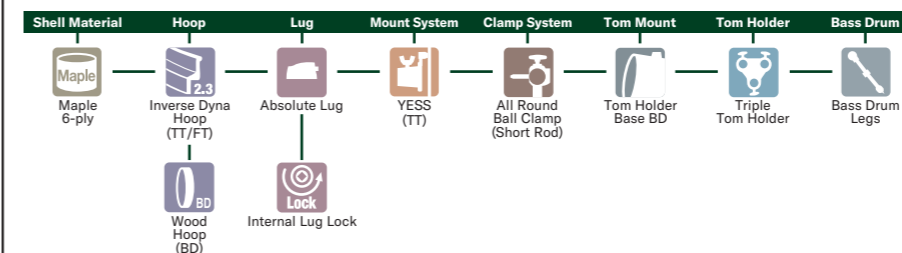

Improved P Type Strainer is designed for ease of grip and smooth operation. Butt side also offers adjustable height. Strainer lever utilizes a silicon rubber for secure locking with quiet operation.

4-piece Shell Pack

TMP2F4 (22" x 16" bass drum / 16" x 15" floor tom / 12" x 8" tom tom / 10" x 7" tom tom/tom holder [TH945C])
