

Get On A Roll

DTX402 SERIES

The moment you play the DTX is the moment you become a drummer. Let it be your inspiration and give instant expression to your impulses and creativity. DTX402 is the culmination of the commitment Yamaha makes as a drum manufacturer with excellent design and sound quality.

Sound

The sound provided by DTX makes drumming so much fun that you'll never want to stop. The DTX402 sounds combine years of experience creating authentic, top-quality drum sounds with 10 built-in drum kits, including acoustic effects and electronic sounds to help you find the perfect voice. You can easily create your own kits and choose from the various high-quality sounds. Give voice to your musical sensibilities with the expressive range of the DTX.

Apps

The free DTX402 Touch app allows any user to easily customize drum kits and take advantage of the training functions. The new Challenge mode gamifies learning to engage and encourage practice and help you quickly develop drumming skills with various genres of music. The DTX402 series also works with the Rec'n'Share app so you can practice and perform with your favorite music and quickly share on social.

Send USB Audio/MIDI to Your Device/Computer

Connect the module to your smart device/computer via USB, and create audio data from sounds produced in the DTX. Connecting the module to your smart device and linking it to your camera app allows you to easily create videos with sounds produced on the DTX402. You can also connect it to your computer and link it with a DAW (digital audio workstation) for music production.

DTX402 Module Specifications

	Accessories	Power Adaptor (PA-130 or an equivalent recommended by Yamaha), Owner's Manual

Training

The DTX comes with 10 built-in training functions that are only possible with an electronic drum and you can access through the module and with the app. The module talks to you to encourage you as your trainer, partner! These include the Song Part Gate function, which trains you up gradually over time, the Rhythm Gate Function, which fosters a precise sense of rhythm – fundamental for drumming, and the Fast Blast Function, which measures the speed of your strokes. There is also a scoring function so you can assess your skills objectively. Take advantage of this complete range of support functions to improve your power of expression as a drummer.

Durable/Quiet/Expressive

These highly durable pads and racks have passed Yamaha's rigorous durability tests and will save you the effort, time, and cost that would normally go into the maintenance or replacement of parts. The firm response of the heads is perfect for practice and allows you to clearly feel the beat you're playing, while the snare and tom pads incorporate Yamaha's unique floating system to deliver a quiet yet pleasant response. Professional engineers weren't the only ones involved in the development of the DTX402 sounds—the performances of multiple drummers were used to fine tune them and make them as naturally expressive as possible, giving them a natural response and expression that allows a smooth transition to acoustic drums.

*Wiring not shown.

DTX452K

- TP70S 3-zone snare pad that allows you to play directly on the snare head or play open or closed rimshots.
- KP65 kick pad and a genuine Yamaha bass drum pedal FP6110A provide smooth action and real feel.

iOS/Android App DTX402 Touch

Price: free
Work with: DTX402 series
Stand alone: —
Device: iPhone, iPad, Android devices

Get a Drummer's Certificate

If you can play all 10 practice songs without making a mistake, you will receive a "Drummer's Certificate".

Learn While Having Fun

There are 10 Training Modes designed to make you a better player, faster. The exercises are a fun way to learn to read drum music notation.

Simple and Intuitive Control

With a simple swipe, you can select and customize kits, song numbers, set up metronome and adjust the triggering parameters for your playing style.

iOS/Android App Rec'n'Share

Price: free
Work with: EAD10/DTX series
Stand alone: Only practice functions usable
Device: iPhone, iPad, Android devices

Music Video Made Easy

Connect a compatible Yamaha Product to your smart phone/tablet to simultaneously record video from your phone's camera, stereo digital audio from your Yamaha product and stereo backing tracks from your music library.

Enrich Your Practice

Pick a song from your music library and the app's tempo detection lets you add a click, change the tempo and select sections to repeat. Audio Track Separation function allows you to adjust the volume of specific tracks (vocals, drums, bass, etc.) of your favorite songs.
