RIVAGE PM10 Editor V1.51 for Win 7/8/8.1/10 Release Notes

Important Notice

Since this software was not designed to be operated via a touch panel in Windows 10, Windows 8, we cannot guarantee operation via a touch panel.

RIVAGE PM10 Series Editor/Firmware Compatibility

Please make sure to match all versions of CS-R10, CS-R10-S, DSP-R10, RPio622, RPio222 and RIVAGE PM10 Editor when you operate the RIVAGE PM10 system. Using an unsupported Editor/firmware combination may result in unexpected behavior. When updating, a TWINLANe network card (HY256-TL, HY256-TL-SMF) must be installed into each rack device in order to update them simultaneously. If any additional TWINLANe network cards are installed after performing the update, please execute the update program again.

Main Revisions and Enhancements

New Feature in V1.51

- Now supports PM10 firmware V1.51.

Fixed Bug in V1.51

- Solved a problem in which a user name not using alphabet characters causes the boot up operation to fail.
